1. Introduction

1.1 Overview

Due to the COVID-19, forcing theatres to limit or even close their doors, encouraging people to stay at home, and increasing the growth of OTT platform subscriptions. OTT platform saw a boom in the market and still growing day by day.

1.2 Purpose

In this project, the aim is to analyze the use of OTT platforms in the country, particularly in the previous two years, and provide insights on regions, shows, reviews, languages, and genres, among other things.

2. Literature Survey

2.1 Existing problem

The way we watch videos has changed dramatically. We now have many OTT platforms to watch TV series and movies online, such as Netflix, Amazon Prime Video, and Disney+. Viewers are considering it extremely difficult to find the best fit for their interests containing high amounts of information and many criteria to compare various OTT platforms.

2.2 Proposed solution

In order to analyze the insights, IBM Cognos Analytics is used. This service is useful in creating dashboards. As an additional feature, the dashboard will be included in a web page.

3 Theoretical Analysis

3.1 Block diagram

Data sets -> IBM Cognos Analytics -> Dashboards -> Web Page (to access)

3.2 Software designing

Hardware and software requirements of the project:

1. IBM Cognos Analytics
2. VS Code

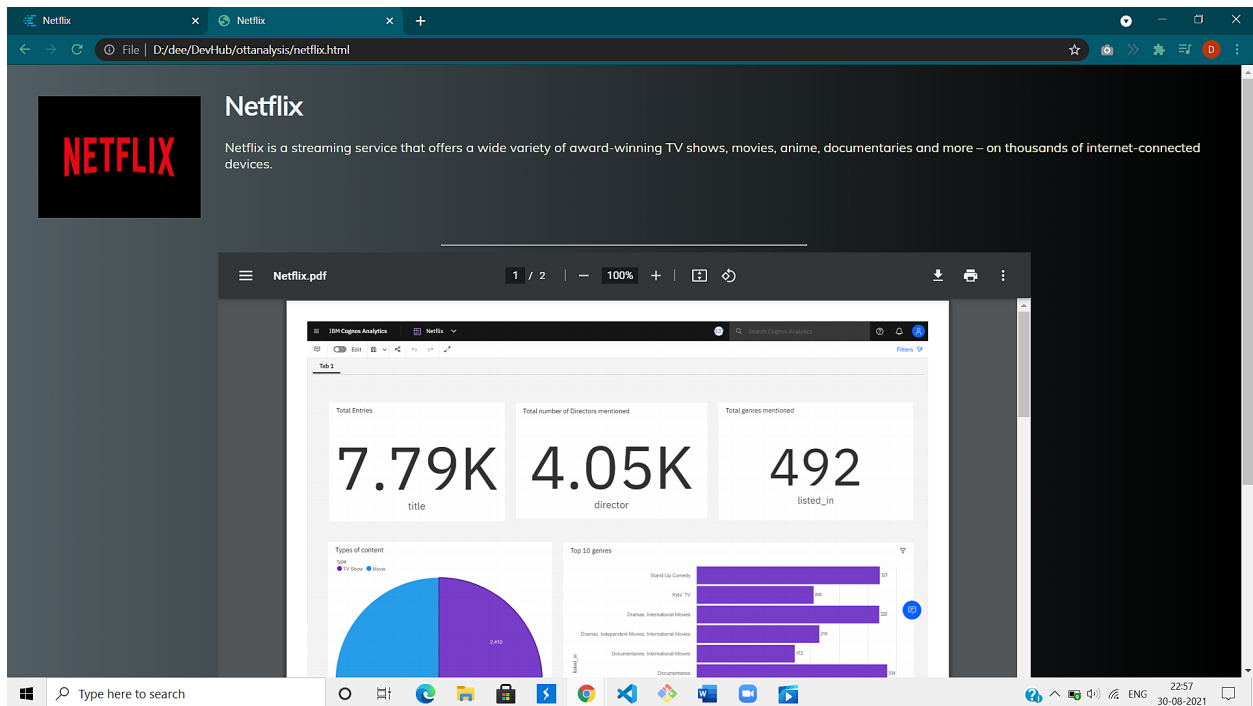

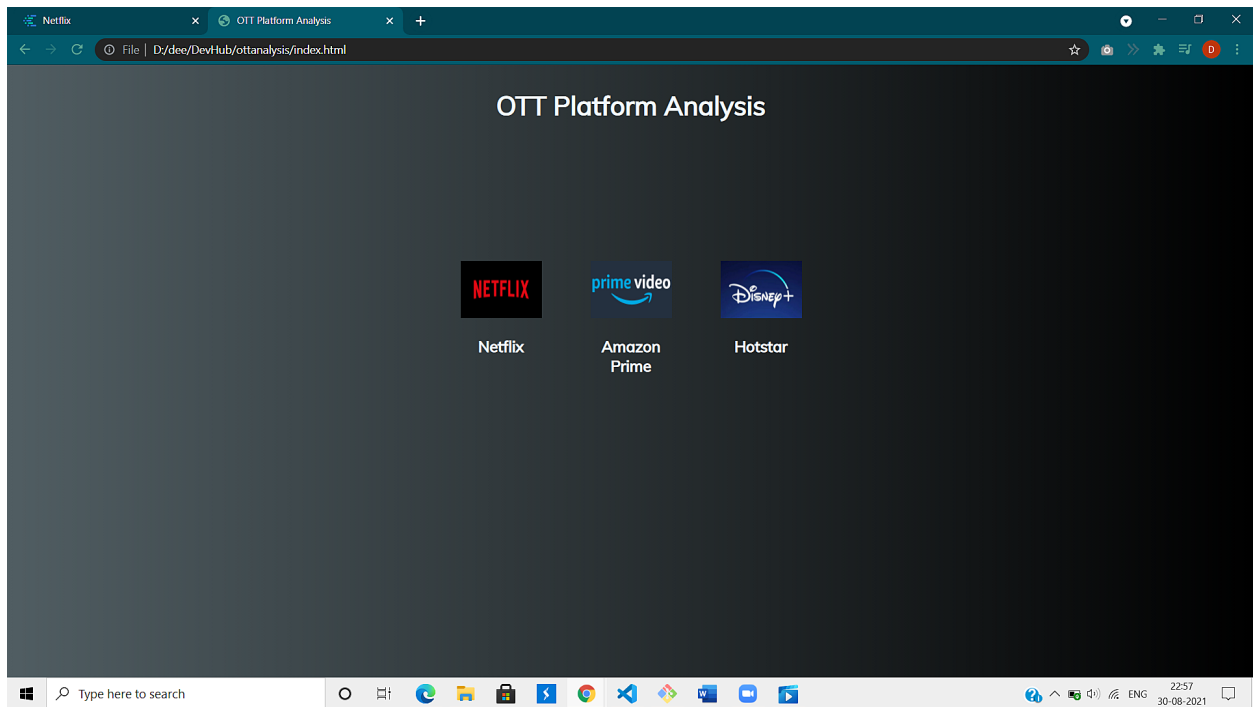

4 Experimental investigations

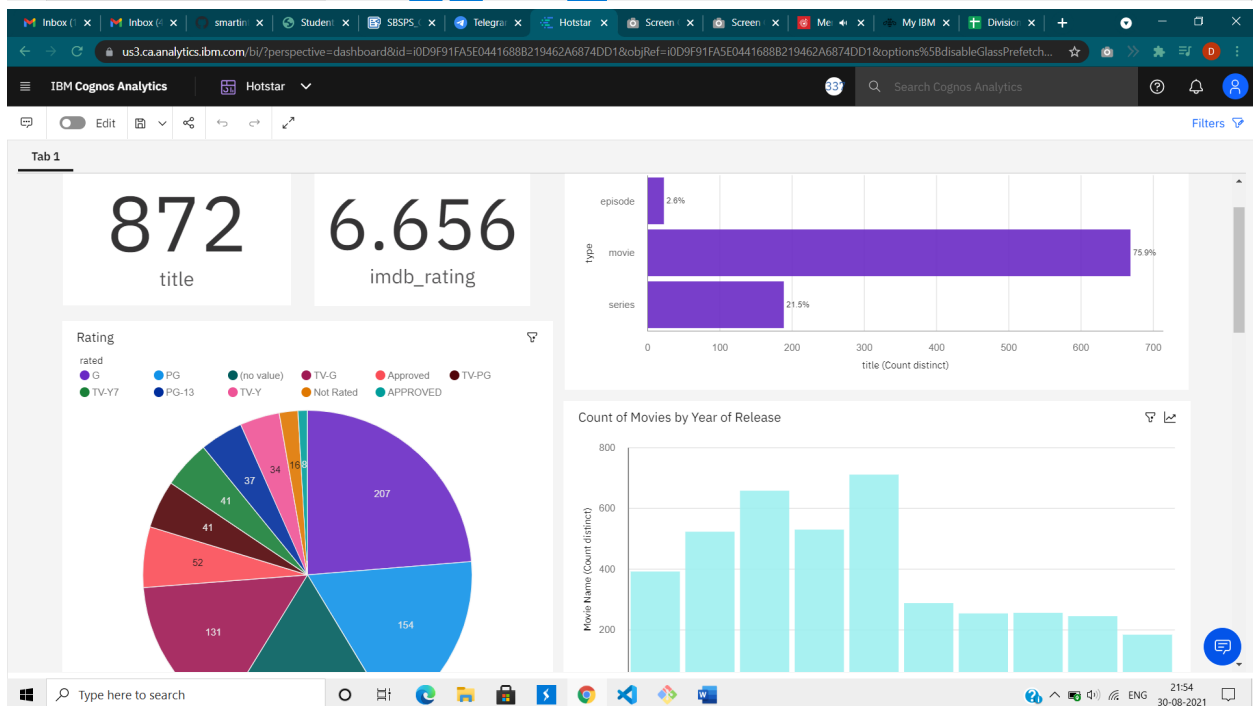

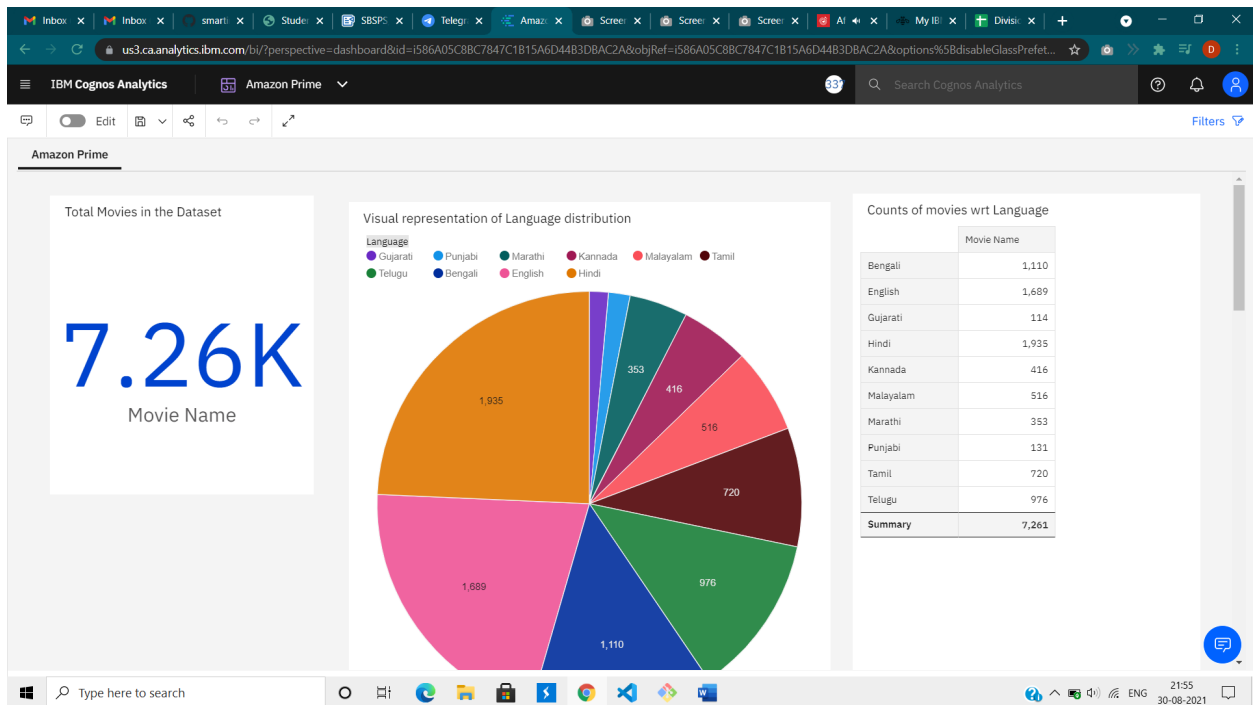

Through the bootcamps arranged by SmartInternz, gained the knowledge of various services of IBM. Courses provided by IBM was also an add-on.

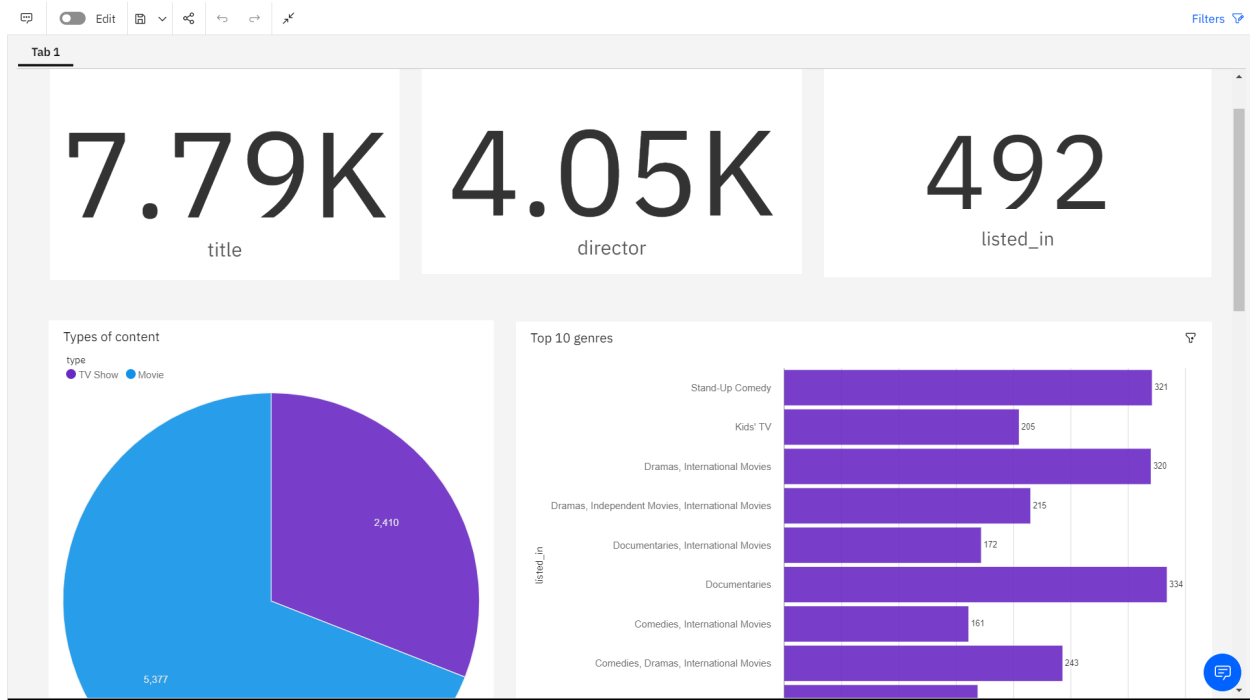

5. Flowchart

6. Results

7. Advantages & Disadvantages

7.1 Advantages

1. Assists the user in quickly gaining an insight of popular OTT platform.
2. User friendly.

7.2 Disadvantages

1. The data is static.
2. Loading of dashboard is slow.

8. Applications

Business Impact:

The pandemic has fueled the expansion of the over-the-top (OTT) market by forcing people to stay indoors. It's no surprise that India's OTT market is one of the fastest-growing in the globe. In terms of minutes of consumption, the market has grown from 181 billion minutes to 204 billion minutes in the last twelve months.

Social Impact:

As a result of boredom, OTT providers in India have discovered that "Binge Watching" as a

culture is on the rise, particularly among Gen Z. OTTs are also taking into Indians' travel and sleep time, as they spend more time watching videos on the go.

9. Conclusion

In order to maintain their current customer base, using the current model will save the financial status of the bank. So, it's worth investing in optimizing the model further to increase cost savings.

10. Future Work

One can improve the dashboard by providing insights in real time by using dynamic data. Also dataset size can be increased.
